Paper Roll and Wire Reel Pallet Truck:

Ergonomic and economic way to transport paper and cable rolls. No power required but has large good quality wheels to sustain a coefficient of friction of about 100 to 1 meaning that a 1000lb paper roll only takes 10lbs of force to move safely and without strain.

Safely transports rolls of material with non-powered pallet style design. Angled ends allow for manually rolling material into position. V-shaped center holds rolls in position. Steering wheels measure 7" x 2" while the load rollers are 3-1/2" x 3". Adjustable lift for different roll diameters.

Model	Fork Size	Roll Size	Lift	Capacity	Weight
PM4-3348-RL	33"x48"	23-5/8"to 31-1/2"	0 to 7-3/4"	4000 lbs	328
PM4-4048-RL	40"x48"	31-1/2"to 47-1/4"	0 to 7-3/4"	4000 lbs	360
PM4-4548-RL	45"x48"	47-1/4"to 63"	0 to 7-3/4"	4000 lbs	378
